

## Acknowledgements

Research was undertaken at UBOS in partnership with ILRI and support from Rockefeller Foundation, WB, WRI, AERC and DFID.

### The research team:

**Thomas Emwanu**

Uganda Bureau of Statistics

**Paul Okiira Okwi**

Economics Department, Makerere University

**Johannes G. Hoogeveen**

World Bank, Washington, DC.

**Patti Kristjanson**

International Livestock Research Institute, Nairobi

**Russ Kruska**

International Livestock Research Institute, Nairobi

**John Owuor**

International Livestock Research Institute, Nairobi

### The Advisory Committee:

**John Lynam**

Rockefeller Foundation

**Margaret Kakande**

Poverty Monitoring Unit, Ministry of Finance

**John Okidi**

Economic Policy Research Center

**John Ddumba-Ssentamu**

Institute of Economics (Makerere University)

The research team would particularly like to thank John Lynam of the Rockefeller Foundation for his impetus to initiate this project and for his early recognition of the great potential that the information generated through this research has for contributing towards reducing poverty in Uganda. His guidance, experience and support throughout the entire process have been invaluable.

We are grateful to UBOS for their support throughout the process. In particular, we would like to thank the Executive Director, Mr. John Male-Mukasa for his commitment to the success of the project, and Lyn Macdonald, former DFID statistical advisor to UBOS. The financial support and encouragement received by DFID to develop an untested approach to arrive at updated poverty estimates for 1999 is greatly appreciated.

We would also like to thank The World Bank for technical and financial support, particularly Peter Lanjouw, Johan Mistiaen, and Qinghua Zhao of the Development Research Group. Jenny Lanjouw (Berkeley) and Chris Elbers (Vrije Universiteit Amsterdam) also had many useful comments and suggestions.

Norbert Henninger, World Resources Institute, shared many of his innovative ideas, such as creating a multi-organization advisory team and research team, as well as his sharing of experiences and uses of poverty maps in other parts of the world. We appreciate all his support. We also appreciate the assistance and shared experiences of Miriam Babita and colleagues at Statistics South Africa. Philip Thornton of ILRI was tremendously helpful throughout the process and we would like to thank him.

Finally, we express our appreciation for the interest and useful comments we received from participants at various technical workshops and seminars organized throughout the research process.
